Jerome Clothiers Rest API Document

Version 1.0

Table of Contents

Introduction

The Jerome Clothiers Rest API allows you to connect to the system and perform different operations using GET, PUT and POST operations.

Records that currently be accessed:

- Order – The Sales Order and the sales order status
- Fabric – The fabric stocked items and their availability
- Lining Fabrics – The lining fabric items and their availability
- Tailor (not required) – The customer's details
- Tailor's Client (not required) – The customer's client details
- Fit Profile (not required) – The customer's client measurements

Rest API URL

https://3857857.restlets.api.netsuite.com/app/site/hosting/restlet.nl?script=380&deploy=2

HTTP Methods

GET – Used to retrieve information. Can be used on all records (Tailor, Tailor's Client, Fit Profile, Order, Fabric, Lining Fabrics)

POST – Used to create new records. Can be used on Tailor's Client, Fit Profile and Order

PUT – Used to update records. Can be used on Client and Fit Profile Records

Response

Response will be in JSON format

Access Method

On version 1.0 you need to pass the developer's account username and password provided on the header and tailor's id and the tailor token in some operations.

Header

On the header needs to be added in the request

```
this.email = "development@jeromeclothiers.com";
this.account = "3857857";
this.role = "1028";
this.password = "Jerome123!";
```

```
Example header code
headers = {
        "User-Agent-x": "SuiteScript-Call",
        "Authorization": "NLAuth nlauth_account=" + cred.account + ", nlauth_email=" + cred.email +
                ", nlauth_signature= " + cred.password + ", nlauth_role=" + cred.role,
        "Content-Type": "application/json"
        };
```

API Methods

Get Request

- Get request is used to get a specific record or a list of records.
- Records that can be accessed in get request are Tailor's Client, Fabric, Fit Profile, Lining, Order and Tailor. You access the records by passing the parameter type CLIENT, FABRIC, FIT_PROFILE, LINING, ORDER, TAILOR.
- In get request there are two types of use, one is getting a single record and the other is getting a list of records. When you pass the parameter id, the system will get the specific record requested but when you did not specify the parameter id the system will retrieve the list of records
- The filters.user and filters.usertoken are given the Jerome Clothiers for each user. For FABRIC and LINING calls you are not required to pass in the filters.user and filters.usertoken.
- List getting a list of records, the default number of records returned is 25 but you can change it by providing a value in the limit parameter.
- For get requests parameters are added at the end of the url

Post Request

- Post request is used to create a record.
- Records that can be accessed in a post request are Tailor's Client, Fit Profile and Order. You can access these by passing the parameter type CLIENT, FIT_PROFILE and ORDER
- In the data you passed you need to also pass the userid and usertoken

Put Request

- Put request is used to update a record
- Records that can be accessed in a post request are Tailor's Client, Fit Profile. You can access these by passing the parameter type CLIENT, FIT_PROFILE
- In the data you passed you need to also pass the userid and usertoken

Fabric Operations

The fabric that will return with stock and stock status are only Jerome Clothier Items.

1. Getting the list of Fabrics

   PARAMETERS
   > type (String)(Required)= FABRIC,
   > limit (Optional)(Number) - page size,
   > offset (Optional)(Number) - page of the search,
   > orderBy (Optional)(String)- for sorting the results, use the field name for sorting,
   > filters.fb-name (Optional)- fabric name
   > filters.fb-vendor (Optional) - vendor name

Example:

https://3857857.restlets.api.netsuite.com/app/site/hosting/restlet.nl?script=380&deploy=2&type=FABRIC&offset=20

   Response:

```
{
  "offset":20,
  "limit":25,
  "data":[
    {
      "id": 260610,
      "name":"TSHL070",
      "vendor":"Jerome Clothiers",
      "stock": 21.17,
      "status":"Available"
    },
    {
      "id": 260420,
      "name":"BA029",
      "vendor":"Jerome Clothiers",
      "stock":0,
      "status":"Out of Stock"
    },
    {...}
  ]
}
```

2. Getting the specific fabric
   PARAMETERS
   > type = FABRIC
   > code (Required)(String) = TSHL070

   Example:

   https://3857857.restlets.api.netsuite.com/app/site/hosting/restlet.nl?script=380&deploy=2&type=FABRIC&code=TSHL070

   Response:
   ```
   {
           "id":260610,
           "name":"TSHL070",
           "vendor":"Jerome Clothiers",
           "stock":21.17,
           "status":"Available"

   }
   ```

Lining Operations
1. Get the List of all lining fabrics

   PARAMETERS
   > type (String)(Required)= LINING,
   > limit (Optional)(Number) - page size,
   > offset (Optional)(Number) - page of the search,
   > orderBy (Optional)(String)- for sorting the results, use the field name for sorting,
   > filters.ln-number - lining number
   > filters.ln-code - lining codeExample:

   Example

   https://3857857.restlets.api.netsuite.com/app/site/hosting/restlet.nl?script=380&deploy=2&type=LINING&offset=20

   Response
   ```
   {
     "offset":20,
     "limit":25,
     "data":[
      {
        "id":54,
        "number":"802780",
        "code":"TR170",
        "stock":98.69,
   ```

```
        "status":"Available"
      },
      {
        "id":30,
        "number":"802714",
        "code":"TR426",
        "stock":98.64,
        "status":"Available"
      },
      {...}
    ]
}
```

2. Get the specific lining fabric

   PARAMETERS
           type = LINING
           code (Required)(String) Lining Code

   Example:

   https://3857857.restlets.api.netsuite.com/app/site/hosting/restlet.nl?script=380&deploy=2&type=TAILOR&code=TR426

   Response:

```
{
        "id":30,
        "number":"802714",
        "code":"TR426",
        "stock":98.64,
        "status":"Available"
}
```

Order Operations

1. Gets the Order Status

   Description: Returns the fabric and the cmt status of the tailor's order

   PARAMETERS
   type = ORDER,
   limit (Number) - page size,
   offset (Number) - page of the search,
   orderBy (String)- for sorting the results, use the field name for sorting,
   showPaidOrders (String)-Yes/No – This is used to filter out paid orders, by default it is No
   filters.user (Required)(Number) - tailorid given
   filters.usertoken (Required)(String) token given to user

   Example

   https://3857857.app.netsuite.com/app/site/hosting/restlet.nl?script=380&deploy=2&type=ORDER&offset=20&filter.userid=5&filter.usertoken=12345

   Response

```
{
  "offset":2,
  "limit":25,
  "data":[
        {
      "id":852738,
      "orderNumber":"26217-1",
      "date":"04/08/2020",
      "client":"Hugh Stanford",
      "item":"Basic CMT – Jacket",
      "fabrictext":"",
      "fabricStatus":"",
      "fabricsentdate":"",
      "fabrictracking":"",
      "cmttext":"",
      "cmtStatus":"",
      "cmtsentdate":"",
      "cmttracking":"",
      "dateNeeded":"07/10/2020"
    }
  ]
}
```

2. Gets the order details

   Returns the order details along with the items

   PARAMETERS
         type = ORDER
         id (Required)(Number)
         filters.user (Required)(Number) - tailorid given
         filters.usertoken (Required)(String) token given to user
   Example

   https://3857857.restlets.api.netsuite.com/app/site/hosting/restlet.nl?script=380&deploy=2&type=ORDER&id=852743&filters.user=1

   Response

```
{
  "id":8527432,
  "orderNummber":"262192",
  "date":"05/20/2020", (MM/DD/YYYY)
  "orderSubtotal":0,

  "orderTotal":0,
  "shipTo":"Sample address",
  "items":[
    {
      "fabric":"TSHL070",
      "productType":"3-Piece-Suit",
      "client":"16375",
      "designOptions":[
        {
          "type":"Jacket",
          "option":[
            {
              "name":"jm-ms-j",
              "value":"Half canvas"
            },
            {
              "name":"T010201",
              "value":"T01020101"
            }
          ]
        },
        {
          "type":"Trouser",
          "option":[
            {
              "name":"tm-m-t",
```

```
                "value":"Traditional with pleated waistband"
              },
              {
                "name":"T010535",
                "value":"T01053501"
              }
            ]
          },
          {
            "type":"Waistcoat",
            "option":[
              {
                "name":"m-ms-w",
                "value":"Traditional"
              },
              {
                "name":"T011701",
                "value":"T01170102"
              }
            ]
          }
        ],
        "fitProfiles":[
          {
            "type":"Jacket",
            "fitprofile":[
              {
                "name":"fit",
                "value":"Slim"
              },
              {
                "name":"block",
                "value":"50"
              }
            ]
          },
          {
            "type":"Trouser",
            "fitprofile":[
              {
                "name":"fit",
                "value":"Slim"
              },
              {
                "name":"block",
                "value":"52"
              }
            ]
```

```json
        },
        {
          "type":"Waistcoat",
          "fitProfileWaistCoat":[
            {
              "name":"fit",
              "value":"Slim"
            },
            {
              "name":"block",
              "value":"54"
            }
          ]
        }
      ],
      "fitProfileMessage":"",
      "fabricQuantity":4.25,
      "amount":0,
      "createdBy":"Test User"
    }
  ]
}
```

3. Post the Order
   a. Only add in the design options and fitprofile options that you have, example if product type is 3-Piece-Suit, you should have designOptionsJacket, designOptionsTrouser, designOptionsWaistcoat
   b. Optionally you can add fitProfileJacket, fitProfileTrouser, fitProfileWaistcoat
   Creates the Order

PARAMETER
    type = ORDER
    userid (Required)(Number) - tailorid given
    usertoken (Required)(String) token given to user

Example Data

```json
{
    userid:1,
    usertoken:21321,
    type: 'ORDER',
    data:
    {
      'tailor':1,
      'client':'Test Client',
      "createdBy":"Test User"
```

'items':
[{ 'fabric': 'TSHL059',
          'productType': 'Jacket',
          'client': 'Test Client',
          'designOptionsJacket': '[{"name":"jm-ms-j","value":"Handmade"},{"name":"T010201","value":"T01020102"},{"name":"T010202","value":"T01020201"},{"name":"T010256","value":"T01025601"},{"name":"T010208","value":"T01020803"},{"name":"T010209","value":"T01020902"},{"name":"T010215","value":"T01021501"},{"name":"T010205","value":"T01020501"},{"name":"T010263","value":"T01026301"},{"name":"T010254","value":"T01025401"},{"name":"T010255","value":"T01025501"},{"name":"T010253","value":"T01025301"},{"name":"T010252","value":"T01025201"},{"name":"T010206","value":"Fabric"},{"name":"T010203","value":"T01020316"},{"name":"T010204","value":"T01020401"},{"name":"T010251","value":"T01025108"},{"name":"T010231","value":"Tone on tone"},{"name":"T010211","value":"T01021101"},{"name":"T010212","value":"T01021202"},{"name":"T010210","value":"T01021001"},{"name":"T010213","value":"T01021301"},{"name":"T010214","value":"T01021401"},{"name":"T010267","value":"T01026701"},{"name":"T010207","value":"T140"},{"name":"li-b-j","value":"TR669"},{"name":"li-vnd","value":"Please select"},{"name":"li-code","value":""},{"name":"li-qty","value":""},{"name":"T010216","value":"T01021602"},{"name":"T010217","value":"T01021709"},{"name":"T010247","value":"T01024704"},{"name":"T010219","value":"T01021901"},{"name":"T010228","value":"T01022807"},{"name":"T010229","value":"Tone on tone"},{"name":"T010264","value":"T01026401"},{"name":"T010265","value":"No"},{"name":"T010224","value":"T01022401"},{"name":"T010268","value":"T01026801"},{"name":"T010269","value":"T01026923"},{"name":"T010227","value":"Same as body lining"},{"name":"T010260","value":"T01026001"},{"name":"T010222","value":"No"},{"name":"T010223","value":"T01022301"},{"name":"T010270","value":"T01027001"},{"name":"T010271","value":"T01027123"},{"name":"T010234","value":"Tone on tone"},{"name":"T010225","value":"T01022501"},{"name":"T010262","value":"T01026201"},{"name":"T010230","value":"Tone on tone"},{"name":"T010232","value":"Tone on tone"},{"name":"T010233","value":"Tone on tone"},{"name":"T010221","value":"Tone on tone"},{"name":"T010218","value":"No"},{"name":"T010220","value":"No"},{"name":"T010266","value":"T01026601"},{"name":"T010257","value":"T01025702"},{"name":"T010258","value":""},{"name":"T010259","value":"NA"},{"name":"T010243","value":"T01024302"},{"name":"T010235","value":"NA"},{"name":"T010236","value":"NA"},{"name":"T010238","value":""},{"name":"T010244","value":"T01024401"},{"name":"T010245","value":"T01024502"},{"name":"T010237","value":"M15"},{"name":"T010239","value":"S.P."},{"name":"T010240","value":"DAVOR"},{"name":"T010250","value":""},{"name":"T010261","value":""},{"name":"T010246","value":"T01024601"},{"name":"T010249","value":"T01024901"}]' ,

  }
```

Appendix

CMT Status List

Awaiting Fabric, In Production, Shipped, Pattern Making, On Hold, Processed, Confirmed, Left Factory, Delivered, Cancelled, Production Complete

Fabric Status List

Out of Stock, Preparing, Shipped, Ordered, Cancelled, N/A

Available Product Types and their Code

- Jacket
- Trouser
- Waistcoat
- Overcoat
- Shirt
- 3-Piece-Suit (contains Jacket, Trouser and Waistcoat)
- 2-Piece-Suit (contains Jacket and Trouser)
- Short-Sleeves-Shirt
- Trenchcoat
- Ladies-Jacket
- Ladies-Pants
- Ladies-Skirt
- L-2PC-Skirt (contains Ladies Jacket and Ladies Skirt)
- L-2PC-Pants (contains Ladies Jacket and Ladies Pants)
- L-3PC-Suit (contains Ladies Jacket, Ladies Skirt and Ladies Pants)

Other Operations

Tailor Operations

1. Get the Tailor details

   PARAMETERS

       type (String)(Required)= TAILOR,
       limit (Optional)(Number) - page size,
       offset (Optional)(Number) - page of the search,
       orderBy (Optional)(String)- for sorting the results, use the field name for sorting,
       filters.user (Required)(Number) - tailorid given
       filters.usertoken (Required)(Number) - tailorid given
       filters.tl-name (Optional) - name of subtailor
       filters.tl-email (Optional) - email of subtailor

   Example

   https://3857857.restlets.api.netsuite.com/app/site/hosting/restlet.nl?script=380&deploy=2&type=TAILOR&offset=20&filters.user=1&filters.usertoken=1

Response

```
{
  "offset":0,
  "limit":25,
  "data":[
   {
     "id":5,
     "name":"1",
     "email":"orders@oscarhunt.com.au",
     "phone":"039 670 6303"
   }
  ]
}
```

2. Get the tailor details

PARAMETERS

type = TAILOR

id (Required)(Number) Tailor RECORD ID

Example:

https://3857857.restlets.api.netsuite.com/app/site/hosting/restlet.nl?script=380&deploy=2&type=TAILOR&id=1&filters.user=1&filters.usertoken=1

Response
```
{
        "id":1,
        "name":"1 FIRST TAILOR",
        "email":"orders@firsttailor.com.au",
        "phone":"032 670 6303"

}
```

Client Operations
1. Get the list of Clients

PARAMETERS
        type = CLIENT,
        limit (Number) - page size,
        offset (Number) - page of the search,
        orderBy (String)- for sorting the results, use the field name for sorting,
        filters.cl-email - email of the client
        filters.cl-first-name - first name

filters.cl-last-name - last name
filters.user (Required)(Number) - tailorid given
filters.usertoken (String) token given to user

Example
https://3857857.app.netsuite.com/app/site/hosting/restlet.nl?script=380&deploy=2&type=CLIE
NT&offset=20&filter.userid=5&filter.usertoken=12345

Response

```
{
  "offset":0,
  "limit":25,
  "data":[
    {
      "id":7198,
      "email":"steve.jobs@facebook.com",
      "firstName":"Steve",
      "lastName":"Jobs",
      "phone":"12345678",
      "dateOfBirth":"",
      "company":"",
      "address1":"",
      "address2":"",
      "city":"",
      "state":"",
      "country":"",
      "zipCode":"",
      "notes":""
    },
    {...}
  ]
}
```

2. Get the specific Client

PARAMETERS
type = CLIENT
id (Required)(Number) CLIENT RECORD ID
filters.user (Required)(Number) - tailorid given
filters.usertoken (Required)(String) token given to user

Example

https://3857857.restlets.api.netsuite.com/app/site/hosting/restlet.nl?script=380&deploy=2&ty
pe=CLIENT&id=133&filters.user=1&filters.usertoken

Response

```
{
  "id":133,
  "email":"aaron@oscarhunt.com.au",
  "firstName":"Aaron",
  "lastName":"Lister",
  "phone":"0437815129",
  "dateOfBirth":"",
  "company":"",
  "address1":"",
  "address2":"",
  "city":"",
  "state":"",
  "country":"",
  "zipCode":"",
  "notes":""
}
```

3. Create the Client

PARAMETERS
        type = CLIENT
        userid (Required)(Number) - tailorid given
        (Not Implemented Yet)usertoken (Required)(String) token given to user

Example Data

```
{
        userid:5,
        usertoken:21321,
        type: 'CLIENT',
        data:
        {
                'tailor':5,
                'email': 'hamandbacons@jeromeclothiers.com',
                'firstName': 'Ham',
                'lastName': 'Bacons',
                'phone': '1234567890',
                'dateOfBirth': 'mm/dd/yyyy',
                'company': 'Jerome Clothiers',
                'address1': '123 flamingo road',
                'address2': '',
                'city': 'Sydney',
                'state': 'NSW',
                'country':'Australia',
```

```
                    'zipCode': '1234',
                    'notes': 'test'

            }
        }

    4.  Update the Client

        DATA PARAMETERS
                type = CLIENT
                userid (Required)(Number) - tailorid given
                usertoken (Required)(String) token given to user

        Example Data
        {
                userid:5,
                usertoken:21321,
                type: 'CLIENT',
                data:
                {
                        'tailor':5,
                        'id': '16731',
                        'email': 'hamandbacons@jeromeclothiers.com',
                        'firstName': 'Ham',
                        'lastName': 'Bacons',
                        'phone': '1234567890',
                        'dateOfBirth': 'mm/dd/yyyy',
                        'company': 'Jerome Clothiers',
                        'address1': '123 flamingo road',
                        'address2': '',
                        'city': 'Sydney',
                        'state': 'NSW',
                        'country':'Australia',
                        'zipCode': '1234',
                        'notes': 'test'

                }
        }
```

Fit Profile Operations
   1. Get the list of Fit Profiles

PARAMETERS
    type = CLIENT,
    limit (Number) - page size,
    offset (Number) - page of the search,
    orderBy (String)- for sorting the results, use the field name for sorting,
    filters.fp-client - email of the client
    filters.fp-product-type - first name
    filters.fp-measurement-type - last name
    filters.user (Required)(Number) - tailorid given
    filters.usertoken (String) token given to user

Example

https://3857857.app.netsuite.com/app/site/hosting/restlet.nl?script=380&deploy=2&type=FIT_PROFILE&offset=20&filter.id=5&filter.usertoken=12345

Reponse

```
{
  "offset":0,
  "limit":25,
  "data":[
    {

   },
   {
      "name":"Vent-Length-max",
      "value":"0"
   },
   {
```

```
        "name":"Vent-Length-min",
        "value":"0"
      }
    ]
  }
```

3. Create the Fit Profile
   Data Parameters

   type = FIT_PROFILE
   userid (Required)(Number) - tailorid given
   usertoken (Required)(String) token given to user

   Example

```
{
        userid:5,
        usertoken:21321,
        type: 'FIT_PROFILE',
        data:
        {
                'tailor':5,
                'name': 'Ham Bacons Test Jacket',
                'clientid':'16731', //Internalid of the client
                'productType': 'Jacket',
                'blockValue': '44',
                'measurementType': 'Block',
                'measurementValues': [
                  {
                        "name":"fit",
                        "value":"Slim"
                  },
                  {
                        "name":"block",
                        "value":"44"
                  },
                  {
                        "name":"Posture-max",
                        "value":"0"
                  },
                  {
                        "name":"Posture-min",
                        "value":"0"
                  },
                  {
                        "name":"Collar-Height-max",
```

```
                "value":"0"
        },
        {

                "name":"Collar-Height-min",
                "value":"0"
        },
        {

                "name":"Shoulder-Height-Left-max",
                "value":"0"
        },
        {

                "name":"Shoulder-Height-Left-min",
                "value":"0"
        },
        {

                "name":"Shoulder-Height-Right-max",
                "value":"0"
        },
        {

                "name":"Shoulder-Height-Right-min",
                "value":"0"
        },
        {

                "name":"Armhole-Depth-max",
                "value":"0"
        },
